Custom sizes, closures and logo areas

Fabric Storage Bags

Organise soft goods and seasonal items
Stronger seams and practical carrying handles

Protective Microfiber Pouches

Soft surface for small delicate goods
Drawcord or zipped compact construction

GENTLE BAG

MATERIALS

Bag Materials & Fabrics

Polyester & Nylon

Common options include 210D, 420D, 600D, 900D and 1680D, selected by weight, weave and coating.

Canvas & Cotton

Natural hand feel with flexible weight options for totes, pouches and lifestyle bags.

PU / Faux Leather

Leather-look material with various textures and finishes, commonly used for fashion bags and structured designs.

RPET Textiles

Recycled-content options for projects that require a sustainability story and traceable sourcing.

Mesh & Lining

Breathability, visibility, drainage and cleanability depend on mesh type and lining finish.

Foam & Reinforcement

EVA or PE foam, stiffeners, piping, base boards and webbing are selected by function and bag shape.

GENTLE BAG

BAG CONSTRUCTION

Sewing & Construction Details

Cutting & Panels
Pattern precision, fabric grain and panel efficiency affect consistency and appearance.

Stitching & Seams
Seam allowance, stitch density, binding and edge finishing define durability.

Stress-point Reinforcement
Bar tacks, box-X stitches and strengthened handle joins support load-bearing areas.

Zips & Hardware
Zip size, pullers, sliders, buckles, hooks and adjusters must match the bag function.

Padding & Shape
Foam laminates, piping, base boards and stiffeners control protection and bag form.

Inside Organization
Pockets, dividers, sleeves and elastic loops are engineered by end use and product size.

GENTLE BAG

BAG ACCESSORIES

Handles, Zippers & Hardware

Webbing & Handles
PP, nylon or cotton webbing, shoulder straps, grab handles and handle wraps.

Zippers & Pullers
Nylon coil, metal-look or waterproof-style zippers with custom puller options.

Buckles & Adjusters
Plastic or metal side-release buckles, sliders, D-rings and adjusters.

Drawcords & Closures
Cord, stopper, snap, hook-and-loop and flap closure combinations by bag type.

Labels & Identity Parts
Woven labels, rubber patches, hangtags and internal care labels.

Bottom Boards & Feet
Base support components for structure, protection and better standing performance.

GENTLE BAG

CUSTOM LOGO & FINISHING

Logo & Printing Options

Screen Printing
Bold spot-colour graphics for suitable textile surfaces.

Heat Transfer
Detailed logos and colour effects, subject to material compatibility.

Embroidery
Dimensional branding for fabrics that can support stitch density.

Woven / Rubber Labels
Brand patches, tabs and identity details for sewn products.

Digital / Sublimation Print
All-over patterns and photographic visuals on compatible materials.

Pullers, Trims & Packing
Custom zipper pullers, hangtags, polybags, inserts and retail presentation.

GENTLE BAG

PRODUCTION PROCESS

OEM / ODM Development Workflow

We follow a clear process from your initial requirements to finished bags and shipment.

01

RFQ & Design Brief

Size, function, material, quantity, logo and destination.

02

Engineering Review

Pattern, stitch, trim and structure feasibility.

03

Sampling

Prototype, fit check, revisions and approval.

04

Bulk Production

Purchasing, cutting, sewing and in-process control.

05

Final Inspection

Appearance, dimensions, function and pack-out.

06

Shipment & Follow-up

Carton marking, loading, documents and after-sales support.

GENTLE BAG

QUALITY CONTROL

Quality Checks During Production

Raw-material Control
Fabric shade, coating, trims and incoming dimensions should be checked before cutting.

In-process Control
Critical seam positions, alignment, attachment strength and hardware placement require line inspection.

Functional Checks
Zipper operation, strap adjustment, pocket access and product fit should be verified against the approved sample.

Finished-bag Audit
Appearance, measurement, stitching, cleanliness and packing quality are reviewed before shipment.

Inspection requirements and testing methods are confirmed according to the product and order specifications.
